

Enterprise RAG Platform

Hybrid retrieval (BM25 + dense) + reranking + eval harness

September 18, 2024

Headline Result

Hybrid+Rerank: Recall@1 0.92, nDCG@10 0.96

Prepared for: Sai Veda

Publishing account: Nikeshk834

Project Context

Production-grade retrieval-augmented generation - offline, deterministic, and evaluated.

This PDF dossier is intentionally visual and interview-ready: it captures the business problem, the technical architecture, the validation evidence, and the committed repository artifacts in a format that reads like a delivered project brief.

Repository slug

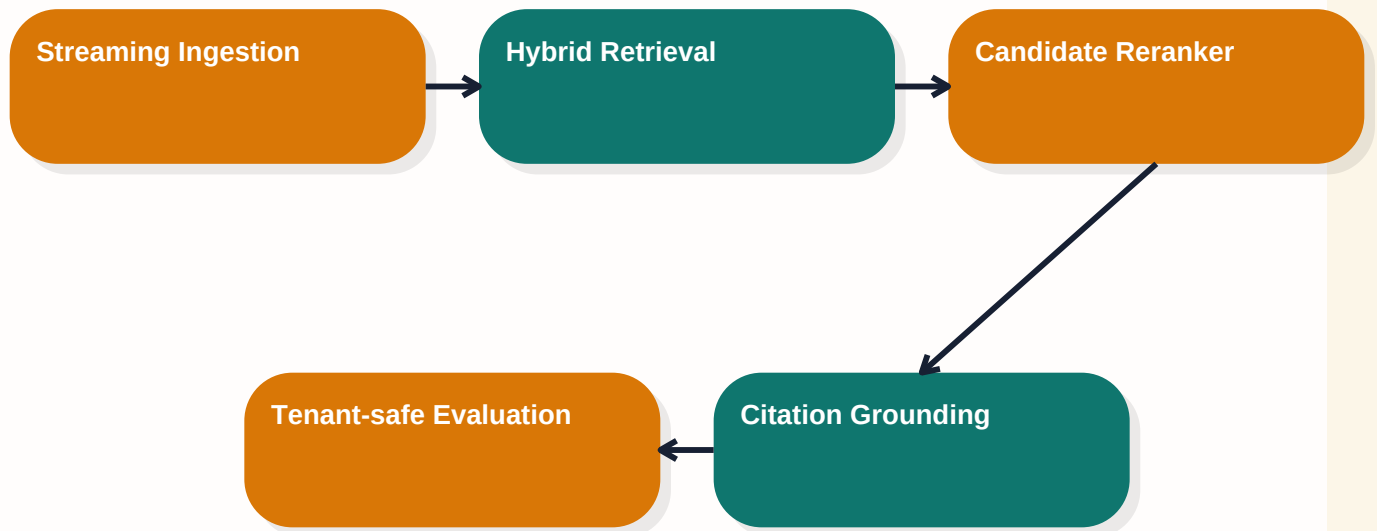

01-enterprise-rag-platform

Validation index

28 tests

Architecture Storyboard

Built around retrieval quality, citation traceability, and strict tenant isolation for enterprise knowledge systems.

High-level focus area: Built around retrieval quality, citation traceability, and strict tenant isolation for enterprise knowledge systems.

Validation And Visual Evidence

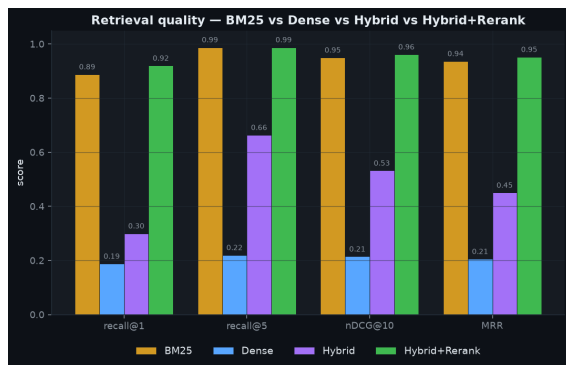

Hybrid+Rerank: Recall@1 0.92, nDCG@10 0.96

28 passing tests

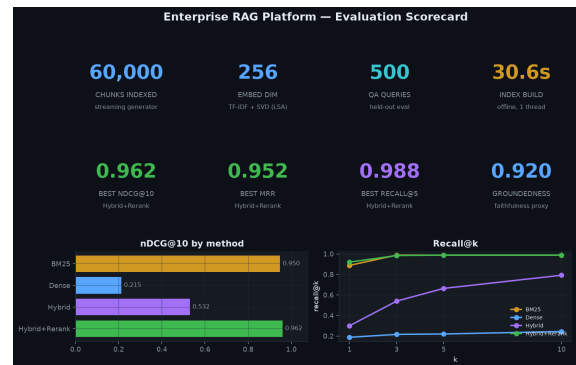

September 18, 2024

Selected benchmark table

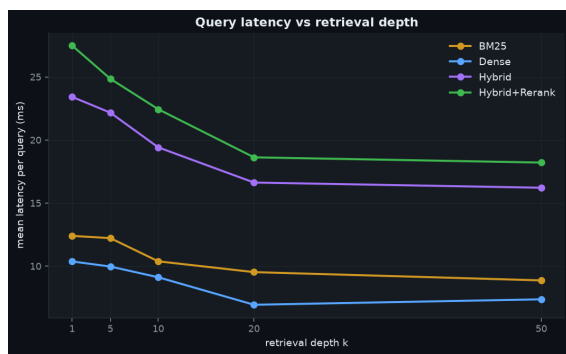

method	recall@1	recall@3	recall@5	recall@10
BM25	0.888	0.988	0.988	0.988
Dense	0.188	0.216	0.220	0.244
Hybrid	0.300	0.540	0.664	0.792
Hybrid+Rerank	0.920	0.984	0.988	0.988

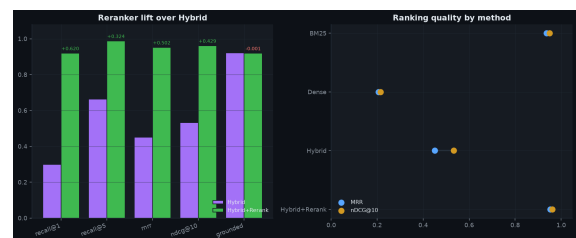

Retrieval quality - 4 methods compared

Evaluation scorecard

Query latency vs retrieval depth

Reranker lift & ranking quality

Repository Handoff

Prepared for: Sal Veda

Publishing account: Nikeshk834

Project date: September 18, 2024

Repository: 01-enterprise-rag-platform

Production-grade retrieval-augmented generation
- offline, deterministic, and evaluated.

Committed deliverables

- README.md - product overview, quickstart, and measured headline numbers
- ARCHITECTURE.md - detailed design and scale trade-offs
- tests/ - automated validation suite
- benchmarks/ - measured run artifacts and result tables
- assets/ - generated dashboards, charts, and screenshots
- PROJECT_DOCUMENT.pdf - styled project brief for sharing and review

This document is intentionally more visual than the repository Markdown. It is meant to read like a polished project brief: business framing first, architecture second, proof third, and delivery scope last.
